

Actemium, improving industrial performance

Actemium's offering is designed to improve the industrial performance of their customers' sites by

- ✦ Optimising **productivity**
- ✦ Reducing **energy consumption**
- ✦ Increasing the **availability and sustainability of facilities**
- ✦ Streamlining **maintenance organisation and costs**
- ✦ Committing to shared **objectives in an innovative way**

The Actemium network's size and organisational structure, broad range of expertise and ability to share feedback enable its teams to commit to offering and implement innovative solutions and services that create added value.

*“ Thanks to **Actemium's knowledge and experience**, we were able to phase our revamping work and continue production throughout the project. ”*

 **ACTEMIUM**

Improving industrial performance

✦ **Solutions & Services for Industry**

Actemium meets your requirements

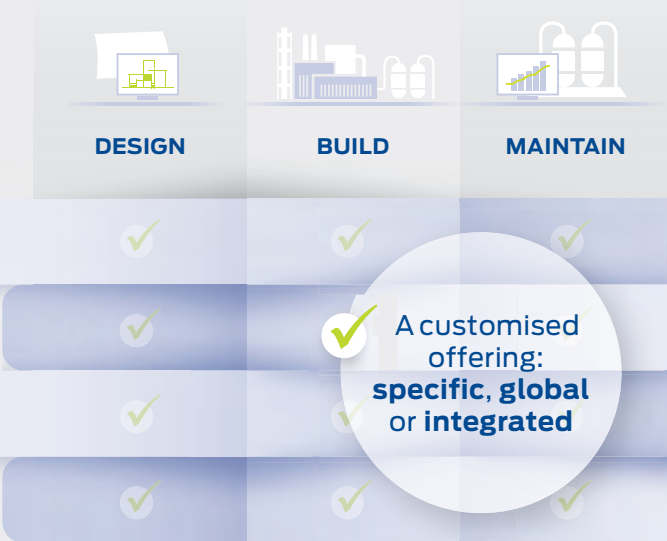

Optimising your sites, developing new markets, coping with technical and regulatory constraints, enhancing responsiveness, safety and quality, boosting energy efficiency etc.
The improvement of your performance is at the heart of your projects.

To address this complex and demanding reality, **VINCI Energies** has developed a brand 100% dedicated to industry: **Actemium**.

Customised services

The Actemium range of services covers the entire industrial life cycle and is based on our profound knowledge of production processes.

A customised offering:
specific, global or integrated

The competence of the Actemium teams in project and contract management, as well as the implementation of best practices, guarantees that your objectives are fully met.

Global vision...

✦ International presence

Actemium's approach to the globalised industrial market relies on the presence of its specialised Business Units in 38 countries.

The exchange of information among these Business Units is stimulated by an active network that mobilises experts per process and connects local Business Units in order to offer customised solutions and services to each individual customer.

✦ Network effect

Actemium's Business Units come together in Process or Offerings Clubs to share expertise and methods and to coordinate the management of major accounts.

The sharing of experience and knowledge continuously enriches and improves its solutions and services, delivering outstanding innovations in each business sector.

✦ A committed partner

Actemium unites its resources and teams to provide the same quality of services and meet the highest standards of its customers throughout the world.

Building on its extensive experience and track record, Actemium serves as a reliable partner able to propose solutions and to commit to long-term strategies.

Safety, our priority

Safety is an absolute priority and a prerequisite on all our actions.

Our teams and Business Units, operating under our safety management guidelines, are empowered and constantly focused on meeting our only possible objective: Zero Accidents.

...and a local focus

✦ Local Business Units

Actemium's decentralised organization, with flexible and responsive Business Units on a human scale, perfectly fits within the VINCI Energies management model. Located close to production sites, they build long-term relationships with their customers.

Thanks to the profound knowledge of the customers process and equipment, they are able to design and implement customised solutions.

✦ A positioning as an expert

The industry requires a specialized approach. Each Business Unit is therefore focussing on a few targeted areas of expertise or process.

This enables them to continually expand their capabilities and develop relevant and innovative offerings. They are identified as reference Business Units within the network.

✦ Shared values

The men and women working at Actemium share the same organisational model and human values based on responsibility and solidarity.

Actemium's strong networking culture multiplies opportunities for mutual enrichment and twinning.
